

OGMP 2.0 Asset Manager Network

Empowering Excellence among Asset
Managers to curb Methane Emissions in
the Oil & Gas Sector

Asset Manager Network

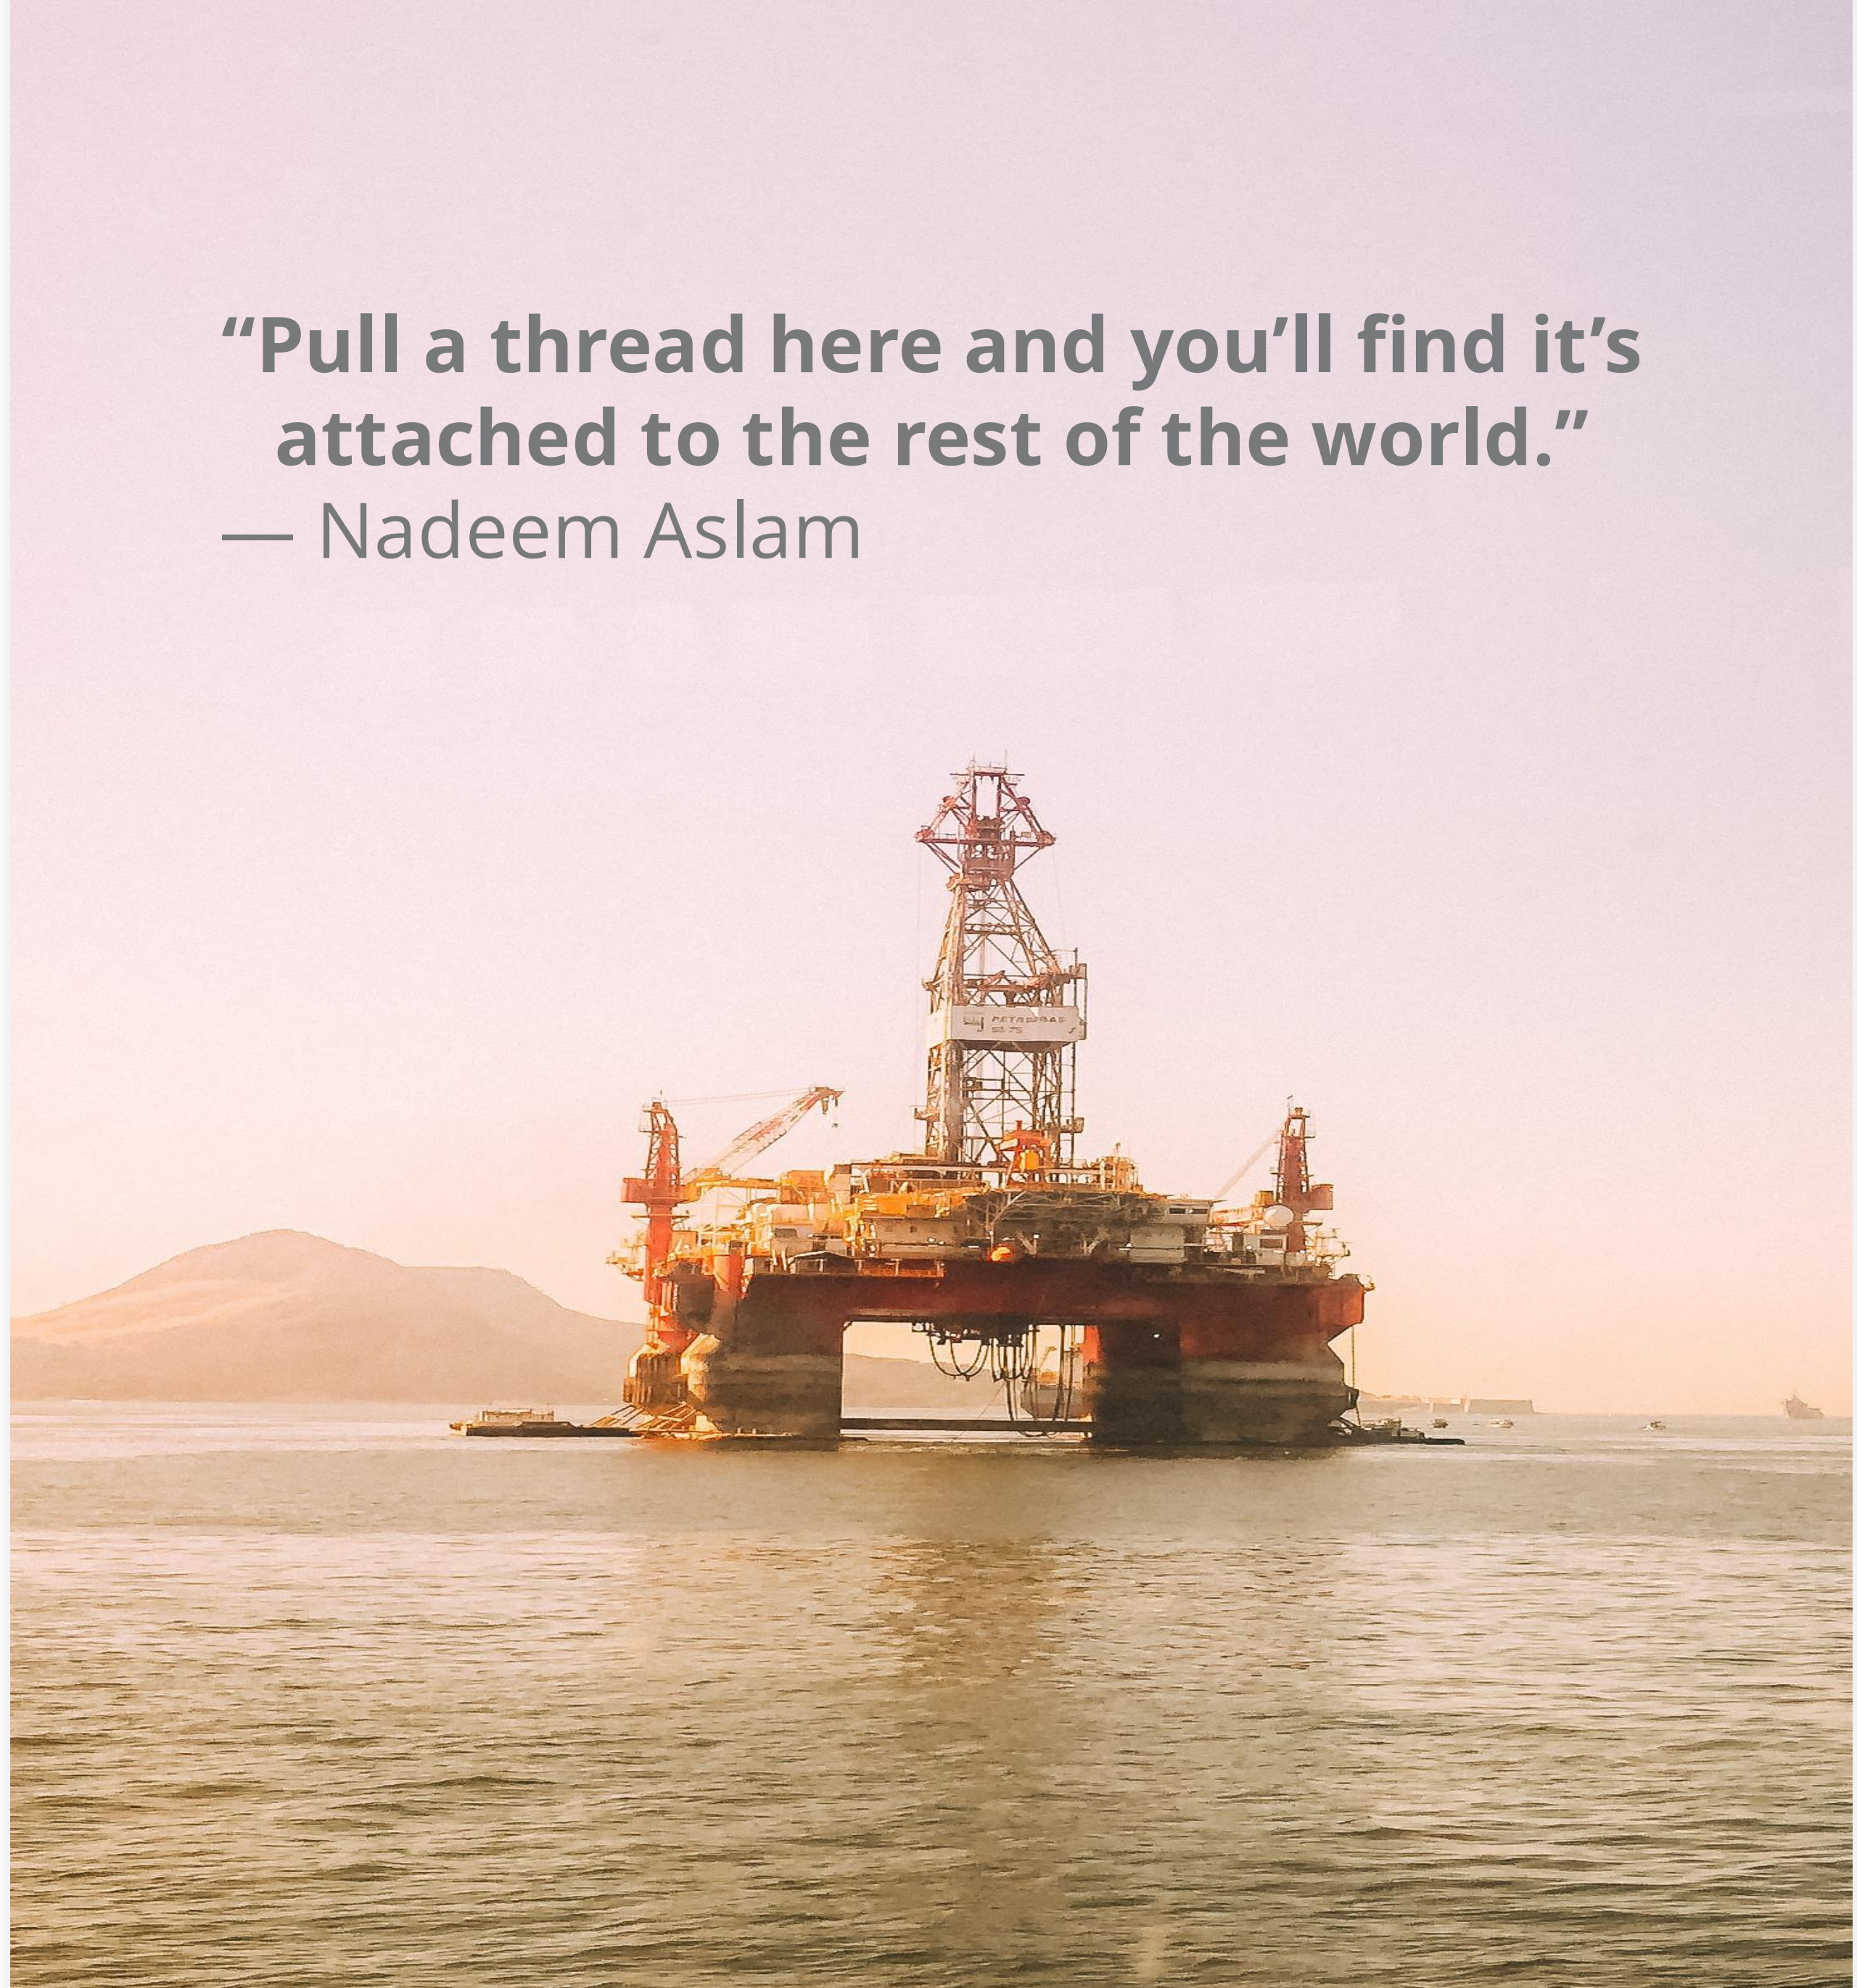

About

OGMP's **Asset Manager Network** brings together leaders in the oil & gas industry to who have committed to actively measuring and mitigating methane emissions - a key source of greenhouse gases which contribute to global warming.

The AM Network aims to strengthen relationships between practitioners and asset managers to inspire action to reduce methane emissions.

It provides a platform for leaders to **connect, engage, and learn** to catalyse actions to reduce methane emissions.

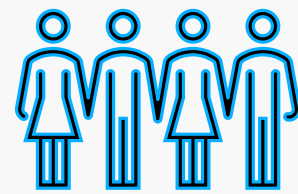

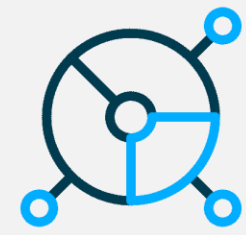

“Pull a thread here and you’ll find it’s attached to the rest of the world.”
— Nadeem Aslam

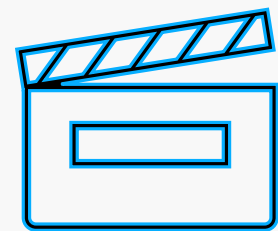

Insights

1. CEO-level **endorsement** enables teams to act, but it is actions on the ground that reduce emissions. Working level teams are **influencing** upward and downward to drive change
2. **Navigating** new technologies and the needed expertise to deploy them remains challenging, time consuming, uncertain and onerous to manage. These **complicate** decision making and slow implementation.
3. **Awareness**, understanding of the corporate commitments, climate warming potential of methane, and **visibility** of the data leads to emissions **reductions**.
4. Asset Managers roles are key to **mitigation**. Their needs are specific, bespoke, contextual.
5. Process safety processes consider emissions risks, but an **inherent tension** exists: a safe site can still emit GHG gases
6. OMGP 2.0 has **galvanized** changes in focus, reporting, roles and responsibilities, visibility, engagement, aligned methodology

Asset Manager Network Focus

Experience sharing

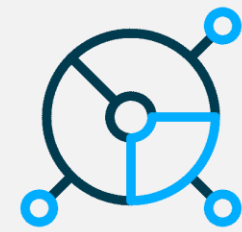

Technical knowledge building

Resources

Asset Manager Network

Value to you

Connect

With global
community of
industry peers

Engage

In a critical topic to
shape the global
agenda

Learn

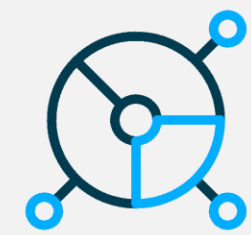

By accessing real-life
challenges and
solutions with support
from leading
knowledge experts

Lead

an initiative to
develop and test
innovative and
scalable ideas to
address methane
emissions

Asset Manager network

How to join

Benefit

No fee to join
A growing network of practitioners
Shared experiences solutions
Access to content
Mentoring
Shape the issues

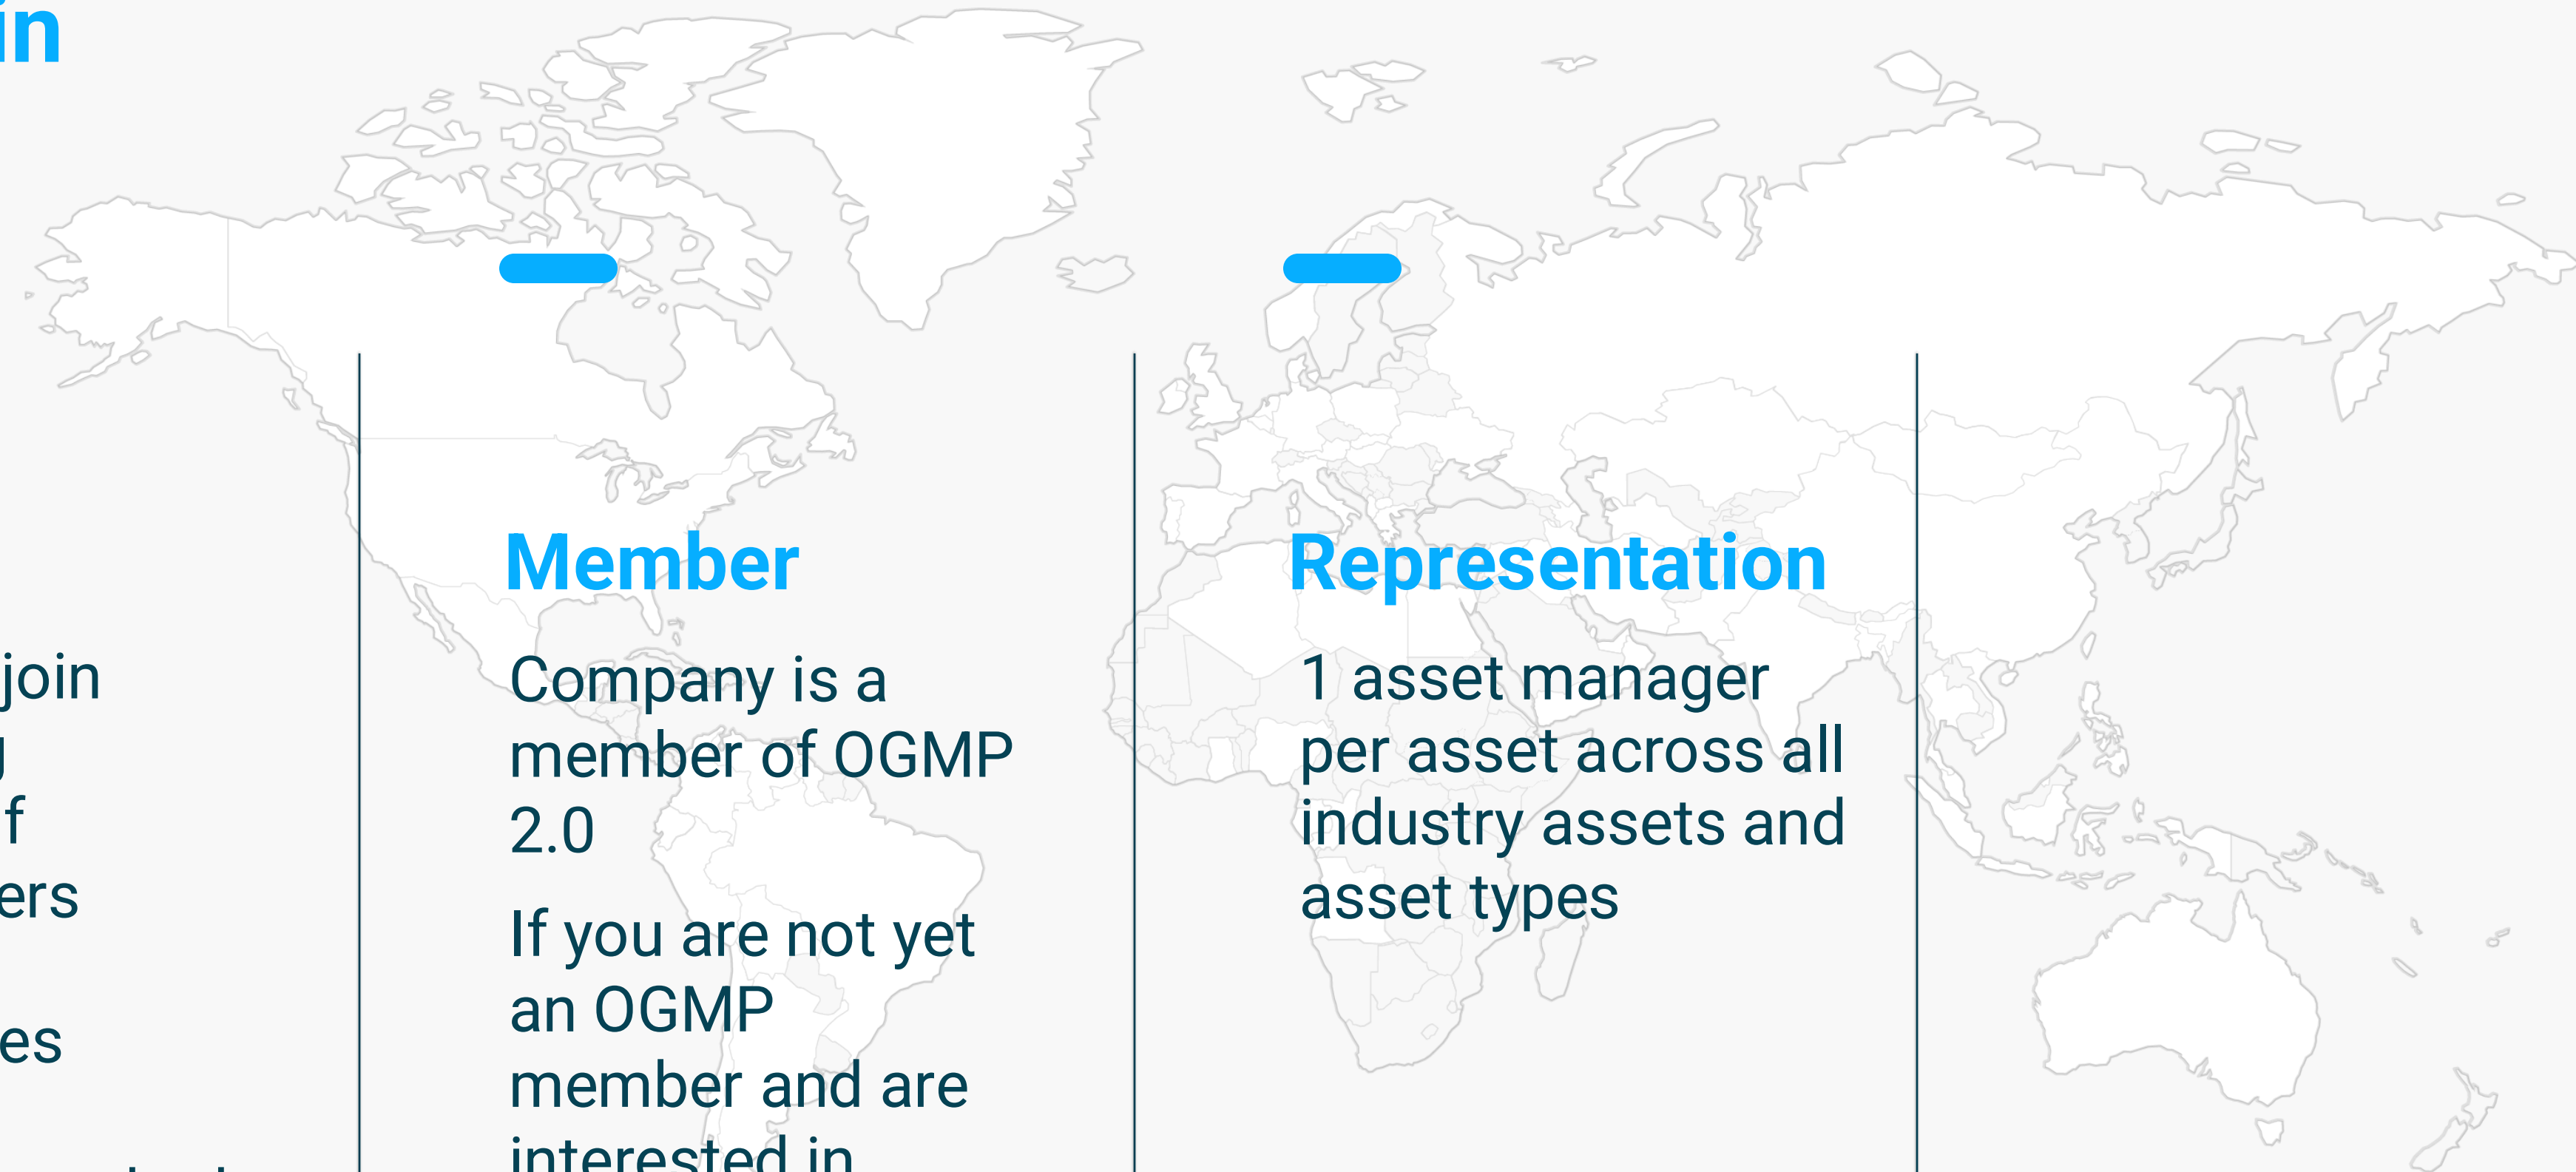

Member

Company is a member of OGMP 2.0
If you are not yet an OGMP member and are interested in joining the Network, please get in touch

Representation

1 asset manager per asset across all industry assets and asset types
